Raymark Mateo Satingasin

BSIT Student · Web and Mobile App Developer San Carlos City, Negros Occidental, Philippines · rymrkmateo@gmail.com

Profile

Second year Information Technology student who builds web apps, mobile apps and admin dashboards, from the database to the screens. Experienced with React and Supabase, and with Kodular for Android apps. Looking for opportunities to keep learning on real projects and grow into a professional developer.

Education

Bachelor of Science in Information Technology Central Philippines State University, San Carlos Campus, San Carlos City, Negros Occidental Currently in 2nd year

Skills

- **Web development:** HTML, CSS, JavaScript, React, responsive design
- **Backend and data:** Supabase database SQL, Express, CRUD, data structures and algorithms
- **Mobile app development:** Kodular, TinyDB, app logic and testing
- **UI/UX design:** Figma, wireframing, prototyping

Projects

FUNRUN Registration System (Web app, group project of four)

- Built a fun run registration web app with React and a Supabase database.
- Created a password-protected admin dashboard with a participant table, processing queue, activity history and name lookup.
- Applied data structures and algorithms: queue, stack, binary search tree, searching and sorting.

PhotoBook (Photography booking website)

- Built a customer site where users browse photographers, view profiles and send booking requests.
- Built an admin dashboard with Supabase sign-in, a sidebar layout, and pages to manage bookings, photographers and packages, including photo uploads.

Quiz Competition (Android app, Kodular)

- Made a quiz app with three subjects (English, Math and Filipino) and ten questions each.
- Added score messages and a leaderboard saved with TinyDB.

CRUD Dashboard (Web app)

- Built a dashboard for creating, viewing, editing and deleting records using an Express server and a Supabase database.

Figma Prototype (UI/UX design)

- Designed a clickable app prototype showing screen layouts, components and the user flow before development.
